Pre-requisites

Add following sources in Cydia :

Touch-Mania <http://cydia.touch-mania.com/>

David Ashman : <http://david.ashman.com/apt/>

Verify that following sources are configured in Cydia (they should be) :

Ste Packaging <http://repo.smxy.org/cydia/apt/>

BigBoss <http://apt.bigboss.us.com/repo/files/cydia/>

ModMyi <http://apt.modmyi.com/>

Install following packages in Cydia :

iBlank
Blanknull
Categories v2.29 minimum
Five Column Springboard
FiveRows GUI
SpringJumps
WinterBoard
MulticonMover
Lockscreen Clock Hide
Fontswap
Six Icon Dock

Configuration of the applications

Launch Categories, and create following folders :

Home → All your favorites applications
Media → multimedia software
Nav → navigation software and travels
Webapps → web applications
Games → games (yes it's easy)
Set → Settings and customization

Be sure to create theses folders in this right order.

Modify each category to assign it a visible icon (Apps, Games, etc.)

Insert your application in each folder as you want, except applications that have to stay on main pages (see screenshots farther in this document)

Configure FiveiRows :

Launch FiveiRows and activate the two first options. Clic on Respring.

Configure SpringJumps :

Launch SpringJumps, go to General and disable options Page titles and Jump Dock. Go back in Springjumps' menu, icons, and activate only 6 first pages (0, 1, 2, 3, 4 and 5)

Configure iBlank :

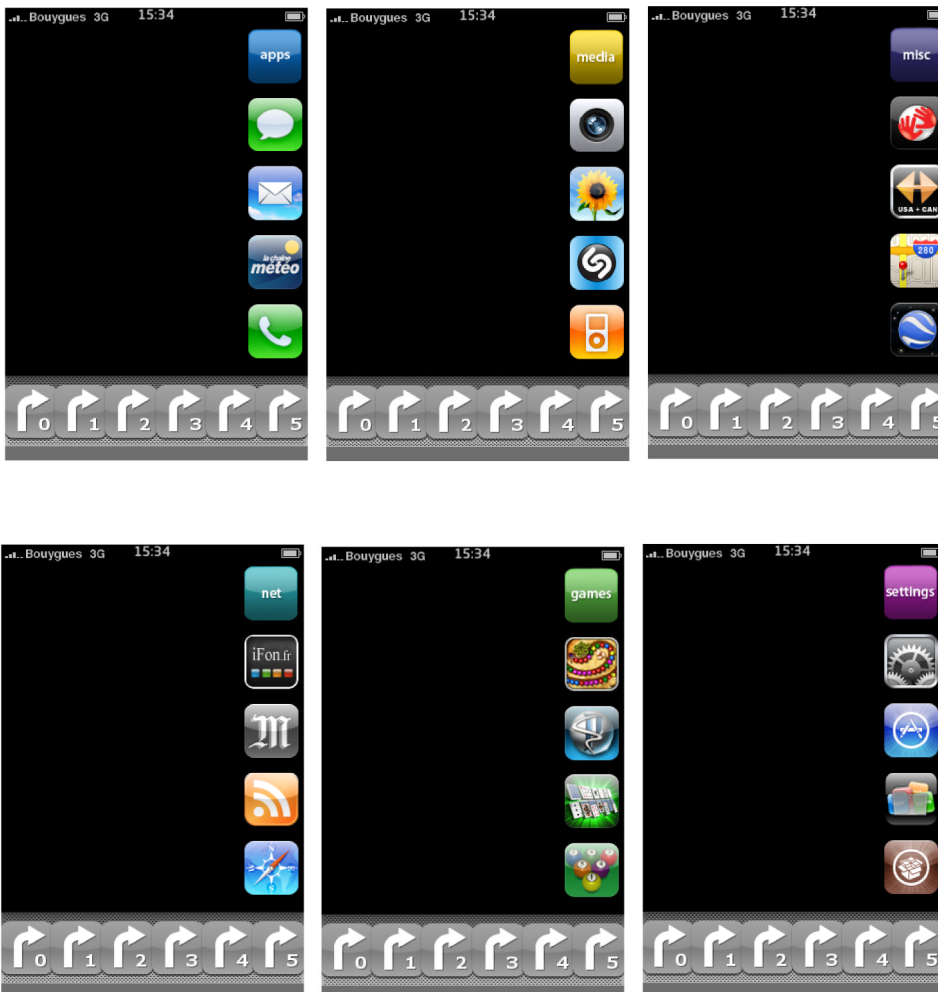

Launch iBlank and create 120 transparent icons . You will have to put 20 icons on each of the 6 pages.

Configure FontSwap (optional) :

Launch Fontswap, and activate the font Neotech in System Fonts (download and install it if necessary)

Theme Install

Place icons like this on each page (MultilconMover will help !) :

Transfert the themes « ArtnBrushed .theme » and « ArtnBrushed .Categories » in the iPhone's following folder : `/var/stash/Themes.xxxxx` de l'iPhone

Launch Winterboard, and activate the theme « ArtnBrushed .theme », and the themes « No undocked icon labels » and « No docked icon labels »

Once the icons placed, enter in each Categories folder, clic on the little « i » at the right bottom corner of the screen, and configure as following :

- Folder title: off
- Icon labels: off
- Use background.png: on

Left right scroll: on
Keep resident : on
Rows: 4
Icons theme: ArtnBrushed.Categories

SBS settings Theme Install

Transfer the « ArtnBrushed.sbsettings » in the following folder of your iPhone:
/var/mobile/Library/SBS settings/Themes

In the SBS settings parameters, select the ArtnBrushed theme.
